
Decatur Township Schools

Indianapolis, Indiana • School District • System Integrator: Davis Industries, Inc.

THE CLIENT

The Metropolitan School District of Decatur Township comprises six schools across nine buildings, administering a total of 5,000 students and 500 teachers.

THE CHALLENGE

Decatur Township's prime directive was a comfortable, healthy learning environment after ongoing complaints from staff and students. HVAC had to adhere to strict indoor-air-quality regulations and operate efficiently to keep costs low across a large, ever-changing set of rooms — with central and remote monitoring from any location, simple operation for maintenance staff, and power monitoring to accurately forecast long-term savings.

THE SOLUTION

Davis Industries delivered an integrated, open building automation system that gives the district central and remote monitoring and control across all six schools and nine buildings. The system maintains indoor-air-quality standards, keeps operation simple for maintenance staff, and includes power monitoring to track and forecast savings — with room to integrate other facility-management controls in future.

HIGHLIGHTS

- Central and remote HVAC monitoring across six schools and nine buildings
- Serves 5,000 students and 500 teachers
- Maintains strict indoor-air-quality standards
- Power monitoring to forecast long-term savings
- Simple operation for maintenance staff
- Room to integrate future facility-management controls
- Efficient operation to keep operating costs low
- A flexible, expandable design

SYSTEMS & COMPONENTS

- Circon programmable HVAC controllers
- Circon terminal-unit controllers
- Power / energy monitoring
- Central and remote web-based access
- Multi-vendor field devices
