
WAGO Corporation

Germantown, Wisconsin · Production and Office · System Integrator: Egan Automation, Inc.

THE CLIENT

WAGO Corporation is a leading-edge manufacturer of I/O control modules and other surface-mount electronic products. Its 60,000+ square-foot North American headquarters in Germantown, Wisconsin combines a single-story production and manufacturing area with a two-story office and research facility.

THE CHALLENGE

The WAGO complex needed to be more than an effective manufacturing facility and headquarters — it needed to be the North American showpiece of its German parent, WAGO International. The company wanted to highlight both its own technology and its interoperability with other systems, requiring an integrated building automation system with an efficient, scalable graphical front-end.

THE SOLUTION

WAGO selected Circon for one simple reason: they needed a system that would work from day one. They easily integrated their own devices, and through Circon's Visual Integrator™ software the entire

building automation network is monitored and controlled — HVAC throughout the complex, over 100 individual lighting zones, and external lighting, signage, and exhaust fans.

“Give Circon the highest marks for customer support and quality of their products. Once integrated, it just plain works.” — Tracy Lenz, Senior Support Engineer, WAGO Corporation.

HIGHLIGHTS

- Full-featured, open and interoperable building automation system
- Seamless integration of HVAC and 100+ lighting zones
- Integrated WAGO's own devices alongside Circon controls
- Circon Visual Integrator™ front-end with afterhours access
- Occupancy-based lighting control in every office
- Cost-effective system monitoring
- Unlimited capability for future expansion
- “Once integrated, it just plain works.” — WAGO Corporation

SYSTEMS & COMPONENTS

- Circon unitary HVAC controllers
- Circon terminal-unit VAV controllers
- Circon Visual Integrator™ / System Integrator™ software
- Leviton lighting controls (100+ zones)
- WAGO LAN bus coupler & I/O system
- Occupancy wall-switch sensors
